

# Custom Control Panels

Consulting - Automation  
Since 1992

***RTS Consulting - Automation offers some of the most comprehensive, turn-key panel solutions in the market.***

*From designing and fabricating a wide range of specialized control panels, while offering technical support from design concept to completion, RTS tailors each cabinet to exact specifications using products from trusted manufacturers.*

*All equipment manufactured within our plant is subject to a rigid Quality Assurance inspection procedure and extensive factory acceptance testing (FAT). Every panel is fabricated using a strict quality assurance system based on many years development of "best practices" and ISO 9001:2015 procedures.*

*With a vast and in-depth knowledge of industrial automation, our team has an incredible depth of experience allowing RTS to take on virtually any project for any industry.*
